

To support our international working Technical Drawing Team, the cm.project.ing GmbH is looking for a

BIM integrator (f/m)

What you need:

- Technical education as an engineer/architect
- Experiences in the field of planning and drawing of piping systems or in the field building sector (architectural drawings)
- Knowledge of BIM processes, software and standards
- Interest in the practical application of BIM across the full construction lifecycle
- Working knowledge of AutoCad design package
- Demonstrated proficiency with Plant 3d CAD, Revit and/or Navis
- Utilize Navis Works to view 3D models and conduct reviews
- Other Autodesk software is a plus
- Preferable experience working in the glass industry
- Good English skills
- Excellent interpersonal and communication skills
- Motivated self-starter
- Strong interpersonal skills
- A precise and well structured working method
- Ability to work effectively in a multi-discipline team environment

Your function:

- Support the development, management and delivery of the BIM standards
- Implementation of drawings
- Clash detection
- Coordinating models
- Coordination meetings
- Working with site teams and visit the site to ensure BIM procedures are followed

What we offer you:

- a position in an international working and market-leading engineering office
- a modern and well-appointed workplace
- an attractive remuneration
- a good working atmosphere in a young and dynamic team
- a sense for a good work-life-balance

Please send your complete application documents per mail.
